

## **LOFT VENTILATION**

### **(ManThorpe Felt Vents)**

ManThorpe Felt Lap Vents are a refurbished product designed to increase the amount of ventilation entering the existing roof space.

This product is usually fitted retrospectively to properties with additional loft insulation; however, these Felt Lap Vents will help to combat the problem of condensation built up in any roof space with a lapped felt/membrane construction.

### **BENEFITS**

- Improved Ventilation
- Eliminates most condensation problems occurring in the loft
- Quick/ Easy to Install
- Built in clips to hold the vent's secure
- Light weight Solution
- Fully Recyclable

Each felt lap vent creates an air gap delivering up to 3000mm<sup>2</sup>/m of ventilation air flow. These specific vents are made from an injected molded polypropylene which are a super lightweight solution that is 100% recyclable.

Depending on the structure and size of your loft will determine how many Felt Lap Vents you will need installed.
