

Loft Hatch and Ladder

(Fakro)

FAKRO loft ladders are necessary for anyone looking to use the extra storage space in their loft, it allows access without the installation of a costly and space-consuming staircase.

FAKRO's signature build-quality and innovative design are evident in each loft hatch and ladder. The result of a combination of premium materials and expert craftsmanship is a strong and reliable ladder that can be used safely on a regular basis allowing you easy access into the loft.

BENEFITS

- Install completed within 1 day
- Handrail for safe access and support
- Reduce heat escaping
- Lower energy bills due to draft proofing stopping any draft

You may be indecisive between 2 different options:

1. Do I get the Aluminum 3-piece pulldown ladders?
2. Do I get the more expensive Wooden ladders?

What's the difference?

We at VerdantGreen can confirm from our experience in the loft industry that the 3-piece aluminum ladders are more flimsy and awkward to use. Yes, they are the cheaper option, but we highly recommend the Fakro wooden ladders.

The wooden Fakro ladders we install come with a safety rail to assist you climbing the ladder. They are much stronger and sturdier for daily use.
